Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-63 and 79-90, drawn to an optical pickup apparatus for reading information on a rotating optical medium, classified in class 369, subclass 128.
- II. Claims 64-78, drawn to an apparatus for reading information on information plane of an optical medium, classified in class 369, subclass 47.28.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as without require an operation of leading and lagging electrical signals as required in the invention I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
